

## Marine Tactical Air Command Squadron 28 Command's Safety Policy

The safe accomplishment of the MTACS-28 mission is critical to mission success. Additionally, it is our inherent responsibility to take care of our own. Safety is not just another step or program, it is the underlying component to everything we do on and off-duty.

Safety is the responsibility of everyone, and most actions are common sense. Many of the directed safety procedures are written in blood. MTACS-28 will comply with the Navy and Marine Corps Aviation Safety and Ground Safety orders that make up the Marine Corps Safety Management System. All will incorporate Operational Risk Management as a fundamental aspect of everything we do. By implementing the four pillars of the Marine Corps Safety Management System: Policy and Leadership, Risk Management, Safety Assurance, and Safety Promotion and Training, as well as establishing a positive command climate, we can seek our desired outcome of operational excellence in everything we do.

We are in an inherently dangerous business. Do not make our adversaries' job easier. Be especially vigilant when dealing with the 'Five Horsemen of Mishaps.'

- Unidentified hazards
- Fatigue
- Complacency
- Stress
- Night Operations

You have the duty and responsibility to protect Marines and equipment required to execute the mission. Do not hesitate to stop and correct improper and / or unsafe actions of others. Use the chain-of-command to highlight safety concerns, or you may anonymously address safety concerns via the Any Mouse program.

**Safety, Security, Professionalism in everything we do.**

Semper Fidelis,

Kyle P. Hahn

LtCol, USMC

Commanding Officer
